

Australian Planning & Property Restrictions Rulebook

Rulebook 3 of 5 — Zoning, Overlays and Land Constraints

Scope: Property-level planning and restriction checks across Australian jurisdictions

Purpose: Draft engineering rulebook for identifying potential legal, financial, planning and document-review risks.

Important: This document is not legal advice and does not determine whether a contract term is enforceable. Rules must be validated against current legislation, official guidance and the complete property documents by a qualified professional.

1. Rulebook Overview

The rulebook supports a hybrid LegalBot workflow: an LLM extracts facts and clauses, deterministic checks identify potential triggers, and a human professional reviews the evidence and legal implications.

2. Proposed Rules

Rule ID	Check	Suggested Output
PLAN-001	Property zoning identified	Verify permitted land uses
PLAN-002	Heritage overlay or heritage listing	Check permit requirements
PLAN-003	Flood or bushfire constraint	Request hazard verification
PLAN-004	Tree protection or vegetation controls	Flag development restrictions
PLAN-005	Right of way or access restriction	Review title and access
PLAN-006	Utility, drainage or sewer easement	Check building limitations
PLAN-007	Planning certificate or report missing	Missing evidence
PLAN-008	Covenant or restrictive condition	Legal and planning review

3. Suggested Rule Object

```
{ "rule_id": "EXAMPLE-001", "jurisdiction": "AU / STATE", "category": "REVIEW_CATEGORY", "trigger":  
"Extracted fact or missing evidence", "risk_level": "REVIEW", "requires_external_verification": true,  
"status": "DRAFT", "version": "1.0" }
```

4. Implementation Guidance

- Store the source clause, page number and extraction confidence for each finding.
- Do not infer compliance when a required document or fact is missing.
- Use current official legislation and government guidance for validation.
- Keep legal rules versioned and record their effective dates.
- Separate factual extraction, rule triggering and human legal review.
- Use official tax and planning services where calculations or property-level data are required.
