

Strata, Owners Corporation & Property Condition Rulebook

Rulebook 5 of 5 — Apartments, Maintenance and Physical Risks

Scope: Strata, owners corporation and property condition review

Purpose: Draft engineering rulebook for identifying potential legal, financial, planning and document-review risks.

Important: This document is not legal advice and does not determine whether a contract term is enforceable. Rules must be validated against current legislation, official guidance and the complete property documents by a qualified professional.

1. Rulebook Overview

The rulebook supports a hybrid LegalBot workflow: an LLM extracts facts and clauses, deterministic checks identify potential triggers, and a human professional reviews the evidence and legal implications.

2. Proposed Rules

Rule ID	Check	Suggested Output
STRATA-001	Strata or owners corporation identified	Request records
STRATA-002	Outstanding or special levies	Financial review
STRATA-003	By-laws and use restrictions	Review purchaser obligations
STRATA-004	Building defects or ongoing litigation	Request documents
PROP-001	Building and pest report status	Flag missing inspection
PROP-002	Repair obligation before settlement	Track completion evidence
PROP-003	Insurance coverage or transfer language	Verify coverage
PROP-004	Septic, drainage or utility condition	Request technical verification
PROP-005	Fixtures and chattels exclusions	Compare contract inventory

3. Suggested Rule Object

```
{ "rule_id": "EXAMPLE-001", "jurisdiction": "AU / STATE", "category": "REVIEW_CATEGORY", "trigger":  
"Extracted fact or missing evidence", "risk_level": "REVIEW", "requires_external_verification": true,  
"status": "DRAFT", "version": "1.0" }
```

4. Implementation Guidance

- Store the source clause, page number and extraction confidence for each finding.
- Do not infer compliance when a required document or fact is missing.
- Use current official legislation and government guidance for validation.
- Keep legal rules versioned and record their effective dates.
- Separate factual extraction, rule triggering and human legal review.
- Use official tax and planning services where calculations or property-level data are required.
